Kanha Sharma

Web Developer | Full Stack Developer | Front-End Developer | Back-
End Developer | Database Engineering
Ghaziabad, Uttar Pradesh, India

Summary

Kanha Sharma is a senior programmer with a robust skill set that
spans across Android development, graphics, and video editing.
Having honed his technical acumen and logical thinking from an
early age, Kanha's foundation in robotics was laid during his time at
Mahima Public Sen. Sec. School. Known for his analytical mindset,
he excels at breaking down complex problems and devising efficient
solutions. His creative flair is evident in his work with graphics and
video editing, where his attention to detail shines. A dedicated and
lifelong learner, Kanha continually seeks to expand his knowledge
and expertise, driven by a passion for innovation and technology.
